> **BALI60 lift and slide doors**

The centre panels of this Bali60 project bi-part to open up 5 metres of uninterrupted space.

A track extension enables this Bali60 panel to slide behind a wall to open up the whole space.

Frame your living space.

# maximum glass for architectural impact

Bali60 panels are raised and lowered 6mm in operation, allowing 'frictionless' movement when sliding and enhanced weather resistance when closed. This system is available in 1, 2 & 3 track options, panels can be designed to open from either or both ends and track extensions enable panels to slide discretely into a recess.

The floor track of the Bali60 can be recessed to create a flush threshold from inside to outside. Other features of this market leading system include secure night vent locking and the option of having all panels sliding.
