

SLIDING DOORS SLIDING WINDOWS SLIDING DOORS SLIDING WINDOWS SLIDING DOORS

An attractive lightweight sliding system.

SINGLE OR MULTIPLE TRACKS SLIDING CORNERS SLIM PROFILES MULTIPOINT LOCKING

lightweight... ...light space

- Slim profiles designed for maximum glass are the design feature of this lightweight thermal system. Up to 8 panels on 4 tracks can be utilised to create impressive glass walls. Minimal frames mean the ISO41 can also be used as an attractive sliding window system.

panel width: max 2000mm

panel height: max 2600mm

panel thickness: 41mm

security: multi point locking with high security euro cylinder locks

> IS041 sliding doors and windows

A sliding corner post has been used on this project, allowing doors to slide away from one another to reveal an impressive open corner.

This IS041 window completes the contemporary look of this kitchen.

These doors are combined with our glazed roof system to allow as much natural light as possible.

slim-line frames

Crisp vertical sightlines of only 51mm maximise your views and allow natural light to flood into your room. A standard feature of this system is that all of the panels can slide, providing you with optimum flexibility. With 1,2,3 or 4 tracks and extensions available for remote stacking, this aesthetically designed product can accommodate a broad range of designs. The IS041 also offers a flush track option, creating seamless unity from inside to outside.

Sliding windows are a neat solution where inward or outward opening casements are not suitable due to space limitations. The IS041 is ideally suited to this application and is an increasingly popular choice as it also offers easily controllable, variable ventilation.
